

Project Management Certification is for professionals looking to become certified in Project Management as a Project Management Professional (PMP) or a Certified Associate in Project Management (CAPM). Project Management is a set of skills which includes budget and time awareness, communication and presentation skills, logical process skill, and more. In this program students will learn the techniques of planning, developing, deploying, and completing a project. These techniques will be enhanced with software application training. These software applications along with training on presentation and organizational skills will help beginning through experienced project managers prepare for PMI® industry recognized certification, improve career potential, and become an important asset to any company.

PMP Certification Prep is a five day course.
